USDA to survey farmers' planting intentions for 2023

Raleigh, NC – February 7, 2023 – As the 2023 crop production season begins, the U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS) will contact producers nationwide to determine their plans for the upcoming growing season.

“Each year, the agriculture industry anticipates USDA's Prospective Plantings report, which provides the first survey-based estimates of U.S. farmers' planting intentions for the year,” said NASS' North Carolina State Statistician Dee Webb. “The March Agricultural Survey provides the factual data that underpins these projections, making it one of the most important surveys we conduct each year.”

NASS will mail the survey to 1,750 NC producers on February 17, asking producers to provide information about the types of crops they intend to plant in 2023, how many acres they intend to plant, and the amounts of grain and oilseed they store on their farms. Producers can respond online at agcounts.usda.gov or by mail. Those who do not respond by February 27 may be emailed a reminder or contacted for an interview.

In accordance with federal law, NASS keeps responses confidential and publishes data in aggregate form only, ensuring that no individual operation or producer can be identified.

The data will be published in the Prospective Plantings and quarterly Grain Stocks reports on March 31, 2023. These results and all NASS reports are available online at nass.usda.gov/Publications/. For more information call the NASS NC Field Office at (919) 733-6333.

###

NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate and useful statistics in service to U.S. agriculture.

USDA is an equal opportunity provider, employer, and lender.
